Experience

Capital One

Jan 2026 – Present

Lead Software Engineer, Tech Lead

Cambridge, MA

- Led the Discover Migration, converting Small Business Mastercard debit cards to Discover debit cards with a team of 5, saving \$1M+ annually in interchange fees.
- Promoted to Lead Software Engineer for driving technical direction and mentoring engineers across customer servicing initiatives.
- Built a custom Claude Code skill to automate agentic code review across the team's pull request workflow, surfacing correctness and simplification issues before merge.

Capital One

Jan 2024 – Jan 2026

Senior Software Engineer, Tech Lead

Cambridge, MA

- Lead technical direction for a team of engineers, overseeing design and implementation of customer servicing features.
- Enhanced customer servicing capabilities through full-stack development with Python, Angular, and TypeScript.
- Led technical architecture for Customer Onboarding, integrating Angular front-end and Python back-end for mass market rollout.

Capital One

Sep 2021 – Jan 2024

Software Engineer

Cambridge, MA

- Developed debit card servicing features for Small Business using Angular and TypeScript, saving \$400K annually.
- Collaborated with cross-functional teams to deliver high-impact features for financial services products.
- Designed and deployed a Python and AWS Lambda-based API for loan payment servicing, handling \$50M+ in transactions.

NRG Energy

Mar 2021 – Sep 2021

Software Engineer

Philadelphia, PA

- Created JavaScript and jQuery tools for Sales & Marketing, optimizing customer enrollment across channels, including an enrollment form for Stream Energy post-acquisition.

HOPE Worldwide

Jan 2020 – Mar 2021

Volunteer

Zhuhai, China; Taipei, Taiwan

- Coordinated weekly Zoom English lessons for 50+ participants across Taiwan during the COVID-19 pandemic.

Capital One

Sep 2018 – Jan 2020

Associate Software Engineer

Wilmington, DE

- Enhanced website features with JavaScript and Java, boosting engagement for millions of users.

Projects

Rampart | *Swift, SwiftUI, Supabase, Stripe*

Jun 2026 – Present

- Solo-building an iOS app using Apple's Screen Time/Family Controls API to let users set device-level content restrictions enforced by a trusted accountability partner.
- Independently navigated Apple's Family Controls entitlement approval and architected the two-sided member/partner authorization backend on Supabase.

Technical Skills

Languages: Python, TypeScript, JavaScript, Java

Technologies: AWS, Angular, Jenkins, Git, Jira, Confluence, Zoom, Slack

AI Tooling: Claude Code, LLM evaluation, spec-driven development
